## Regulations on commercial secrets

Obviously, the entire history of deals and investment is a trade secret of any financial business. The long-term success of a business depends on the safety of information about indicators, the content of the investment portfolio and the investment strategy. GamePlex Group understands this very well. However, we would like to share some of our success with our clients. Therefore, we provide a brief report on some of the deals made as part of investments in eSports.

## General information about deals

All deals made by our analysts are divided into three capital management strategies. The first strategy is conservative and implies minimal risks and a restrained policy in relation to decisions made. The second strategy is balanced and allows moderate risk in anticipation of higher returns. The third strategy is aggressive management, high risk to achieve maximum profitability.

## Application of reporting indicators on the capital example of 1,000,000 US dollars

The topic of eSports, and especially investment in this industry, is a fairly new and difficult process for the average person to understand. Therefore, our Analytics Department has created a financial model for you, where the results of our work are interpreted within the capital of 1,000,000 US dollars. This is aimed to make it easier for you to understand how the investment balance changes after a certain deal and how we achieve such high profitability.

## Conservative strategy

In the table below, you can see general information about deals in the conservative strategy - in the framework of which eSports events we made deals, what was the volume of bets and what was the coefficient of possible profits.

Based on this information, we can identify 3 important indicators for this reporting period:

### Visualization of calculated data

We know that visual perception is very important for understanding complex processes. Therefore, we have presented the main values of the reporting period in the form of graphs and charts for your convenience.

### Profitability indicators of completed deals

Here you can see which profitability indicators corresponded to each of the completed deals and how they changed during the reporting period.

## Dynamics of changes in the capital in the course of deals

Here you can see how the capital amount changed upon each deal if you consider the results of the reporting period on the example of 1,000,000 US dollars.

## Balanced strategy

In the table below, you can see general information about deals in the balanced strategy - in the framework of which eSports events we made deals, what was the volume of bets and what was the coefficient of possible profits.

Based on this information, we can identify 3 important indicators for this reporting period:

### Visualization of calculated data

We know that visual perception is very important for understanding complex processes. Therefore, we have presented the main values of the reporting period in the form of graphs and charts for your convenience.

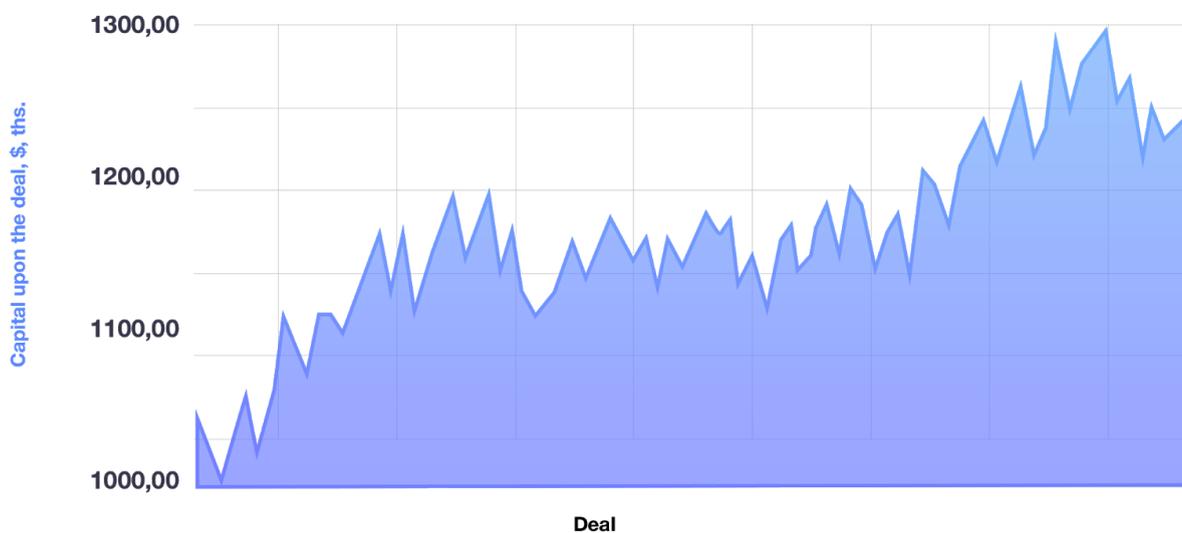

### Profitability indicators of completed deals

Here you can see which profitability indicators corresponded to each of the completed deals and how they changed during the reporting period.

### Dynamics of changes in the capital in the course of deals

Here you can see how the capital amount changed upon each deal if you consider the results of the reporting period on the example of 1,000,000 US dollars.

### Progressive strategy

In the table below, you can see general information about deals in the progressive strategy deals - in the framework of which eSports events we made deals, what was the volume of bets and what was the coefficient of possible profits.
